Investment objective and policy

The objective of the investment fund is to provide consistent long term capital and income growth. The investment policy for achieving the objective is for the Manager to invest primarily in equity securities. There is no restriction to economic securities or geographical areas, but the manager considers the objective can be achieved from investing predominantly in UK equities and seeking undervalued overseas opportunities.

Managers' commentary

Portfolio re-positioning

- The portfolio has been significantly re-positioned over March and the beginning of April with a view to improve the performance of the Unit Trust. The dividend yield has been rebased to a more sustainable level and it is now our intention to grow the income consistently from here along with capital appreciation over the long-term.
- The Unit Trust has moved from a concentrated portfolio of 23 large capitalisation investments solely listed in the UK to 48 companies offering a more diverse global exposure. The Unit Trust will invest in between 45-55 companies, primarily across UK listed equities in order to maintain close dialogue with company management teams. However up to 25% of the portfolio can be listed overseas as we believe some of the best opportunities can surface globally at different times and in different industries. Currently the portfolio has 15% invested overseas. We look to invest in companies for the long-term meaning the portfolio will have a very low turnover.
- We are bottom up investors believing some of the best opportunities lie in under-covered companies and so we will invest right across the market capitalisation spectrum.
- We aim to find high quality companies trading at appealing valuations. Intrinsicly we have a value bias often looking for opportunistic and contrarian investments but also strive to find growth at a reasonable price.
- We employ a concise, simple and transparent strategy that we believe can outperform over the longterm; seeking to find companies with strong balance sheets, with little to no debt, consistent, defensive earnings streams, healthy cash generation, growing dividends and stable market positions. We maintain close dialogue with company management teams and where possible will often spend time at their facilities, meeting employees and continuing to develop our understanding of each business.

Market and Portfolio commentary

Consistent Opportunities Unit Trust in the month of July delivered a modest 0.25% TR against a 1.29% TR rise in the FTSE All Share Index after a strong outperformance in June. The volatility seen last month has dampened slightly following constructive discussion between the European Union and President Trump which have eased some trade fears and whilst there has been no definitive answer there is belief that he does not want to upset markets too much ahead of midterm elections in November. We continue to remain optimistic on the prospects for equities with corporate earnings supported by accelerating global growth.

Turning back to the portfolio, the biggest detractor in the month was Clipper Logistics which moderated future guidance following headwinds in the UK retail environment. The company continues to grow at double-digit rates and we believe the shares, which now trade on 19x earnings, with a 36% ROE offer good value. Indeed, on the day of the announcement we increased our position.

Other notable moves were seen across Corning Inc (+21%) the US listed speciality glass and materials company which issued a set of encouraging results, Clinigen (+10%) after announcing a new product acquisition and RPC Group (+10%), which has rebuffed the short thesis as the company continues to eliminate exceptional costs and focus on cash generation.

New investments were made in July through discounted placings across two interesting UK small caps - Sanderson and Xpediator, a freight management Group which raised money to fund the purchase of a warehouse in the port of Southampton.

Sanderson is a UK technology company which specialises in three main areas; Retail, Manufacturing and Distribution and Logistics. Through its own proprietary software, the Group works closely with well-known brands, such as Superdry and JD Sports, to help with their digital propositions and with manufacturers to help simplify their operations and manage complex issues, such as product traceability and increasing regulation. We believe the shares offer good value trading on 14x earnings and the business is underpinned by a strong balance sheet and 50% of its revenue is recurring on an annual basis.

We also increased our stakes in Flowtech Fluidpower, Kion Group, RPC Group, Van Elle and Victoria in the month.
