Investment objective and policy

The objective of the investment fund is to provide consistent long term capital and income growth. The investment policy for achieving the objective is for the Manager to invest primarily in equity securities. There is no restriction to economic securities or geographical areas, but the manager considers the objective can be achieved from investing predominantly in UK equities and seeking undervalued overseas opportunities.

Managers' commentary

Portfolio re-positioning

- The portfolio has been significantly re-positioned over March and the beginning of April with a view to improve the performance of the Unit Trust. The dividend yield has been rebased to a more sustainable level and it is now our intention to grow the income consistently from here along with capital appreciation over the long-term.
- The Unit Trust has moved from a concentrated portfolio of 23 large capitalisation investments solely listed in the UK to 48 companies offering a more diverse global exposure. The Unit Trust will invest in between 45-55 companies, primarily across UK listed equities in order to maintain close dialogue with company management teams. However up to 25% of the portfolio can be listed overseas as we believe some of the best opportunities can surface globally at different times and in different industries. Currently the portfolio has 15% invested overseas. We look to invest in companies for the long-term meaning the portfolio will have a very low turnover.
- We are bottom up investors believing some of the best opportunities lie in under-covered companies and so we will invest right across the market capitalisation spectrum.
- We aim to find high quality companies trading at appealing valuations. Intrinsically we have a value bias often looking for opportunistic and contrarian investments but also strive to find growth at a reasonable price.
- We employ a concise, simple and transparent strategy that we believe can outperform over the longterm; seeking to find companies with strong balance sheets, with little to no debt, consistent, defensive earnings streams, healthy cash generation, growing dividends and stable market positions. We maintain close dialogue with company management teams and where possible will often spend time at their facilities, meeting employees and continuing to develop our understanding of each business.

Market and Portfolio commentary

Consistent Opportunities Unit Trust gave back August's outperformance returning -2.6% TR against a 0.7% TR in the FTSE All Share Index with Basic Materials and Oil stocks driving the index higher. The political backdrop continues to drive sentiment across the UK Stockmarket. Whilst global growth remains strong particularly in the US, concerns over Brexit continues to unnerve the UK market. The UK market is now one of the cheapest valued developed markets globally in respect of earnings multiples and we believe this should underpin some support for share prices of more domestic focused companies.

Turning back to the portfolio, the main detractor has been Flowtech Fluidpower which fell on the back of a cautious outlook and a delayed contract. The CEO will retire immediately with Bryce Brooks moving from CFO to CEO. This was not unexpected by us and we believe the market reaction has been overdone with the shares trading at a significant discount to peers. Clinigen announced a private placement to facilitate the acquisition of CSM Parent which further establishes them across Europe and we believe whilst the multiple paid looks relatively full, the acquisition is a good fit and establishes a European platform for the company.

There were positive moves across RPC Group (+13%) with Private equity interest announced, Alumasc Group (+10%) which announced they were considering moving to the AIM market to widen their investor base and Anexo Group (+8%) which delivered a resilient set of maiden results post IPO.

The holding of Gym Group was sold outright on valuations grounds after a 50% rerating in the shares in the space of just six months. A new investment was made in recently listed Codemasters which has fallen back on Chinese gaming regulator rulings. The company is a UK based video game developed with a focus on driving and racing games. We believe their remains strong growth opportunities particularly within the Formula One range of games it produces and with the company standing on a significant discount to peers along with a net cash position we believe the company is undervalued.

Finally, we also increased our stakes in RPS Group and Victoria PLC in the month.
