Investment objective and policy

The objective of the investment fund is to provide consistent long term capital and income growth. The investment policy for achieving the objective is for the Manager to invest primarily in equity securities. There is no restriction to economic securities or geographical areas, but the manager considers the objective can be achieved from investing predominantly in UK equities and seeking undervalued overseas opportunities.

Managers' commentary

Portfolio re-positioning

• The Unit Trust in 2018 was repositioned from a concentrated portfolio of 23 high yielding large capitalisation investments solely listed in the UK to 47 companies offering a more diverse global exposure. The Fund will invest in no more than 55 companies, primarily across UK listed equities in order to maintain close dialogue with company management teams. However up to 25% of the portfolio can be listed overseas as we believe some of the best opportunities can surface globally at different times and in different industries. Currently the portfolio has 11.5% invested overseas. We look to invest in companies for the long-term meaning the portfolio will have a low turnover.

• We are bottom up investors believing some of the best opportunities lie in under-covered companies and so we will invest right across the market capitalisation spectrum currently with an emphasis on small capitalisation companies.

• We aim to find high quality companies trading at appealing valuations. Intrinsically we have a value bias often looking for opportunistic and contrarian investments but also strive to find growth at a reasonable price.

• We employ a concise, simple and transparent strategy that we believe can outperform over the longterm; seeking to find companies with strong balance sheets, with little to no debt, consistent, defensive earnings streams, healthy cash generation, growing dividends and stable market positions. We maintain close dialogue with company management teams and where possible will often spend time at their facilities, meeting employees and continuing to develop our understanding of each business.

Market and Portfolio commentary

Consistent Opportunities Unit Trust rose 4.7% in the month of January against the FTSE All Share rise of 4.2%. After a volatile Christmas period, global stockmarkets rose with investors focusing on company valuations, a Dovish Fed update and Brexit negotiations. Sterling was strong in the month rising 3% and the S&P500 had its strongest start to a year since 1987.

Turning back to the portfolio, there was weakness across the shares of Van Elle after a trading update. We met with the company management team which included the newly appointed CEO Mark Cutler who joined from Balfour Beatty. Difficulties arose in relation to the operational efficiencies targeting in the Piling divisions with contracts delayed to the New Year. Smartfoot, which is the most scalable part of the business offers exposure to a significant customer base and they continue to target the larger Housebuilders.

The positive contributors in the month were Macfarlane (+30%), Kier Group (+26%), Greggs (+22%), RPC Group (+22%), Polypipe Group (+21%) and DiscoverIE (+15%). There have been further developments in the bid for RPC Group with Berry Global announcing interest and this offers the possibility of a higher offer than the rather lowly priced Apollo bid, we continue to monitor developments closely. Greggs the Bakers announced a very upbeat trading update and the newly launched Vegan 'Sausage' Roll has been received positively by customers. I visited Newcastle at the start of January and no fewer than 5 Greggs I visited over the course of one day were sold out!

Finally, we continue to invest in the Fund on a personal level and remain committed to the longterm investment strategy. The market remains volatile but the Fund is well positioned, invested across well run companies with strong, unlevered balance sheets.
